Little Bird

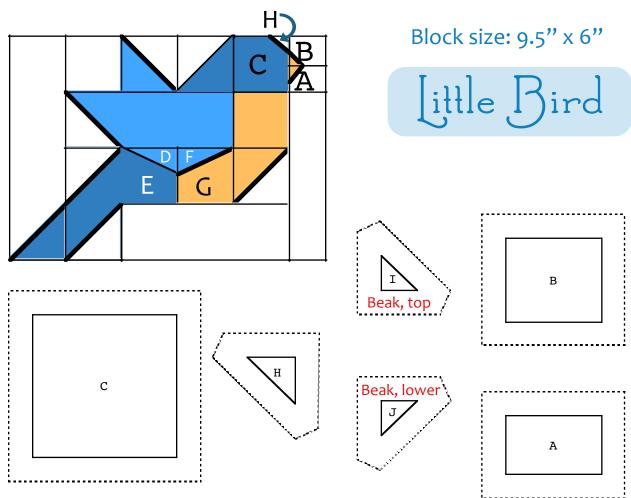

After piecing together the bird, border it several times until reaches 9" x 11." You can make it go 11" W I D E (bird would be landscape orientation), or T A L L (which would have the bird float, portrait style. Layer the tiny quilt top with batting and backing, then quilt. Trim to 8 3/4" by 10 1/2."

Make the sleeve: Hem one short edge of a piece of fabric cut to 8-3/4" by 9-1/2" and place it wrong-sides-down on the back of your mini-mini quilt. Pin in a couple of places.

Cut strips of binding 1 1/4" wide, seaming if necessary to get the desired length. Stitch the binding from the front, right-sides-together, then turn the back, tucking under the raw edge. Hand-stitch closed. Slip it over an acrylic frame to display.
