

BLOCK 14: DAYSPRING

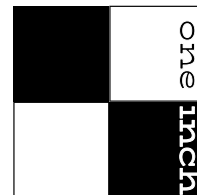

Two ways to handle the split arcs:

1. Using the technique of FPP, stitch up both C or D units, sewing them together at the end by sewing along the dashed line.

2. Glue or tape the units together lining up dashed line, then use FPP techniques to make your block.

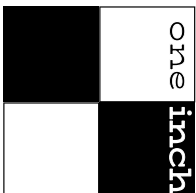

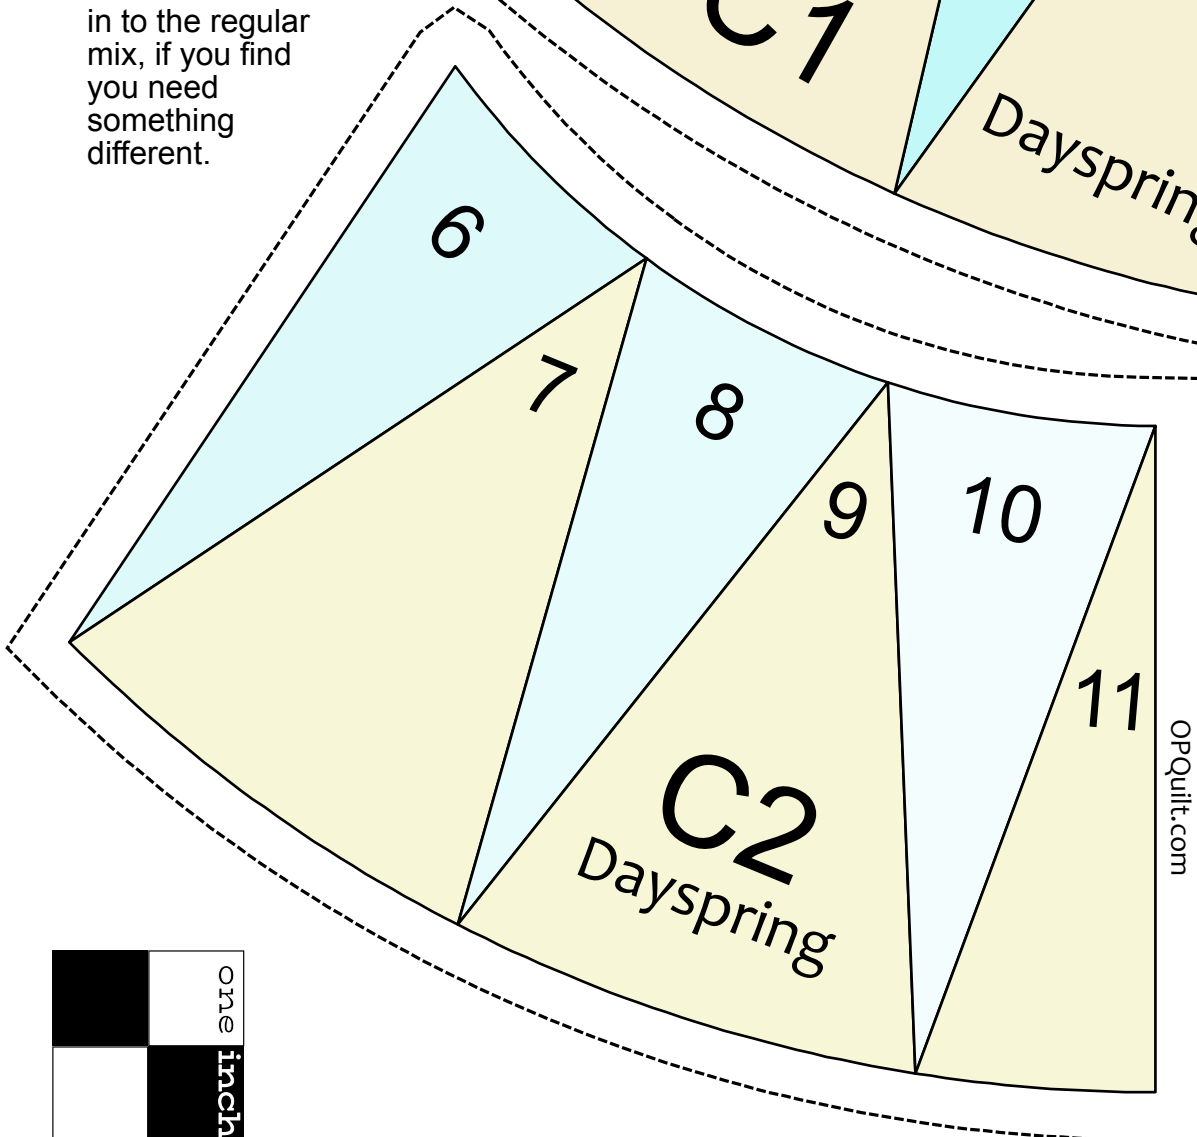

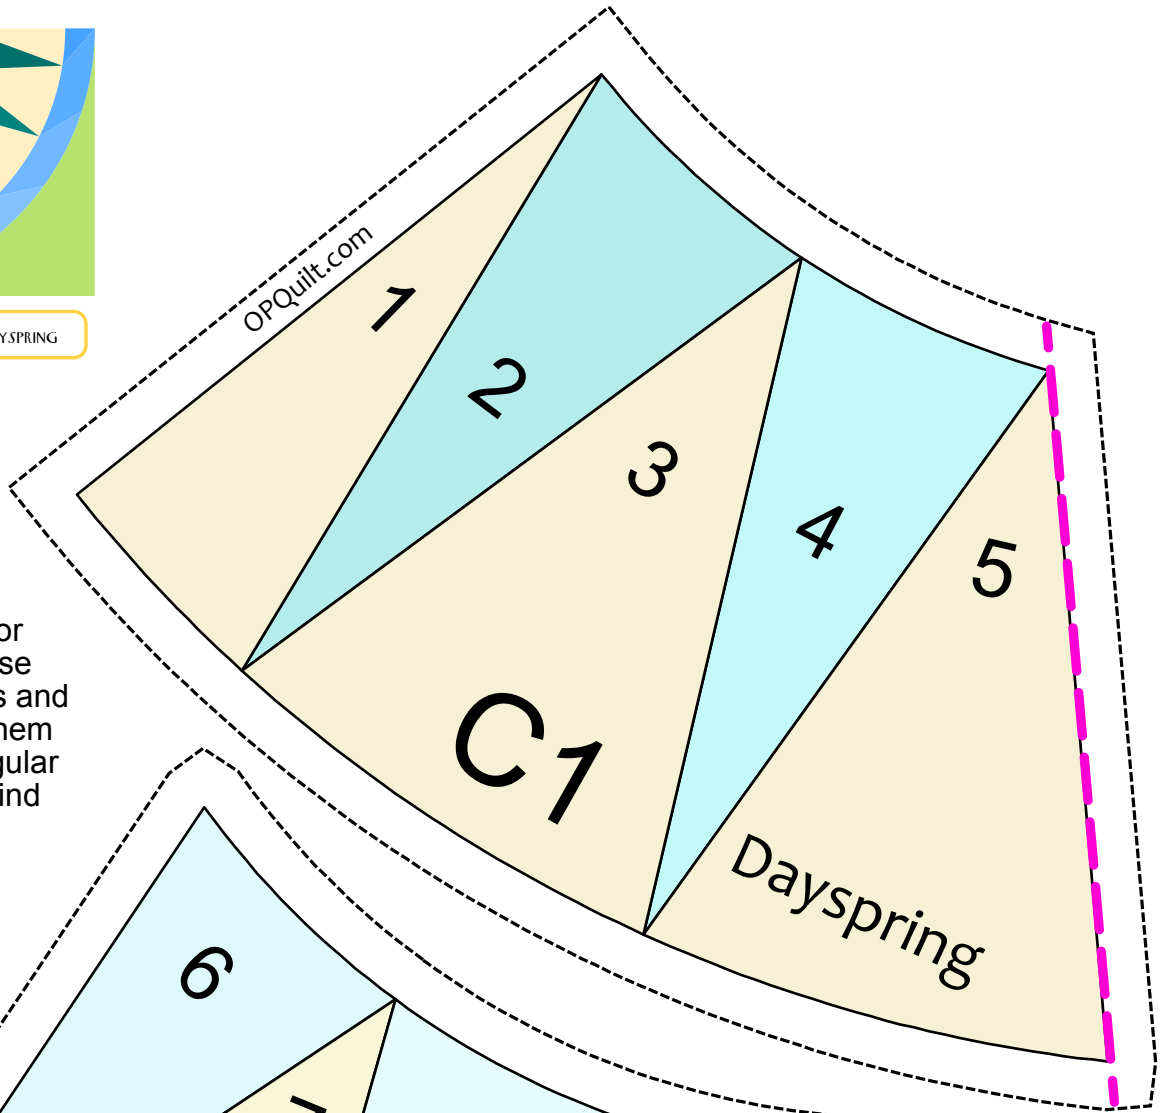

Outside corner piece E is found in the free Block One, or in the full pattern.

BLOCK 14: DAYSPRING

Make one...or two...of these extra blocks and substitute them in to the regular mix, if you find you need something different.

While a common block found everywhere, these colors and ray combinations are my designs. Please don't copy or steal.
